

This year marks the 25th anniversary of the National High Magnetic Field Laboratory, the world's largest and highest-powered magnet lab. Thanks to generous support from the National Science Foundation and State of Florida, we've made discoveries on new materials, developed energy solutions and better understand the cells that underlie life itself — all with the power of magnets.

## HIGHLIGHTS FROM OUR FIRST QUARTER CENTURY:

**25,000+** researchers conducted experiments at the MagLab

From **54** countries and **50** states and territories

**9,600+**  
PUBLICATIONS

**8,500+**  
PRESENTATIONS

**200+**  
BOOK CHAPTERS

**100+**  
PATENTS

**72**  
MAGNETS

**17** WORLD RECORDS

Research was conducted across disciplines.

**30**  
languages  
spoken at  
the lab

**2**  
weddings  
held at  
the lab

**240,000**  
cups of coffee  
served in our  
Jolt Cafe

**21,500**  
late-night  
pizzas eaten by  
researchers

**116,000+** VISITORS  
at annual Open House events

**1,400+** THESESES  
Master's or Ph.D.

**2,000+** STUDENTS  
participated in a camp or  
research experience.

**710+** SCHOOLS  
toured the lab or had a  
lesson in their classrooms.
